

A background graphic consisting of a network of light gray lines connecting several light gray circular nodes of varying sizes, creating a web-like structure.

A mission of ISB is to make quality STEM education a reality for every student regardless of gender, race or socioeconomic status.

Our systems approach drives us to work with all parts of the education system, from students and teachers to principals and district leaders.

We bring our cutting-edge research to the education community through access to our STEM professionals, who inspire administrators, educators and, ultimately, students to deepen their understanding of how to live, work and play in an increasingly STEM-centric society.
